

## Reference to LISS panel data in text:

In this paper use is made of data of the LISS (Longitudinal Internet Studies for the Social sciences) panel administered by CentERdata (Tilburg University, The Netherlands).

## Reference to funding of LISS panel data in acknowledgments:

The LISS panel data were collected by CentERdata (Tilburg University, The Netherlands) through its MESS project funded by the Netherlands Organization for Scientific Research.

## Short description of the LISS panel for use in text:

The LISS panel is a representative sample of Dutch individuals who participate in monthly Internet surveys. The panel is based on a true probability sample of households drawn from the population register. Households that could not otherwise participate are provided with a computer and Internet connection. A longitudinal survey is fielded in the panel every year, covering a large variety of domains including work, education, income, housing, time use, political views, values and personality.

## Reference to more detailed description of the LISS panel:

More information about the LISS panel can be found at: [www.lissdata.nl](http://www.lissdata.nl).
